It was nice talking with you this morning. Thank you for your consideration of EnviroBlend for this site. As discussed, when you are able to obtain a sample you can send it to our lab for a treatability study. We would need 1-2 lb. REPRESENTATIVE sample sent WITH the attached form filled out. You can send the soil as-is in a ziplock bag or whatever is convenient. We can usually turn the results around in a matter of a few days, at which point I can also provide a cost estimate.  
Let me know if you need anything else in the meantime. And have a great weekend!

MO

Postal Code/ Zip  
63026

Comments / Additional Specific Requests

Hello we have Cadmium failing TCLP (4.9 ppm) and Pb TCLP just under the TCLP of 5 ppm along with PCB's. We believe our best option is to reduce the TCLP below the regulatory level for land disposal. Would you have a agent that could help us achieve this? Nonresponsive based on revised scope The project is for USEPA Region 3 Shiloh Church Rd. Site, located in Nathalie, VA 24577. Thank you and I look forward to hearing from you.
